

## Additional Norwegian requirements

### Greenhouse gas emission from the use of electricity in the manufacturing phase

Electricity at Kebonny factory is Norwegian hydro power (certificate of origin)

Electricity	Amount	Unit
Norwegian Hydro power	0,00675	kgCO <sub>2</sub> -eqv/kWh

The GWP is calculated from the corresponding EcolInvent 3.1 datasets, according to the IPCC 2013 method.

### Dangerous substances

- The product contains no substances given by the REACH Candidate list or the Norwegian priority list
- The product contains substances given by the REACH Candidate list or the Norwegian priority list that are less than 0,1 % by weight.
- The product contains dangerous substances, more than 0,1% by weight, given by the REACH Candidate List or the Norwegian Priority list, see table.
- The product contains no substances given by the REACH Candidate list or the Norwegian priority list. The product is classified as hazardous waste (Avfallsforskriften, Annex III), see table.

### Indoor environment

Not relevant the product is used for outdoor applications

### Carbon footprint

Carbon footprint has not been worked out for the product.
