# Hardtop Eco Matt, Jotun U.A.E. Ltd. (L.L.C.)

Jotun A/S

www.epd-norge.no

## **General information**

Product:

Hardtop Eco Matt, Jotun U.A.E. Ltd. (L.L.C.)

Program operator:

The Norwegian EPD Foundation Pb. 5250 Majorstuen, 0303 Oslo

Phone: +47 97722020 e-mail: post@epd-norge.no

**Declaration number:** 

NEPD-2116-960-EN

ECO Platform reference number:

This declaration is based on Product Category Rules:

CEN Standard EN 15804:2012+A1:2013 serves as core PCR. Product descriptions and scenarios are based on IBU PCR Part B for coatings with organic binders. This also applies for inorganic coatings.

Statement of liability:

The owner of the declaration shall be liable for the underlying information and evidence. EPD Norway shall not be liable with respect to manufacturer information, life cycle assessment data and evidences.

**Declared unit:** 

1 kg Hardtop Eco Matt, Jotun U.A.E. Ltd. (L.L.C.)

Declared unit with option:

A1.A2.A3

**Functional unit:** 

Verification:

Independent verification of data, other environmental information and the declaration according to ISO14025:2010, § 8.1.3 and § 8.1.4

External

Third party verifier:

Owner of the declaration:

Jotun A/S

Contact person: Anne Lill Gade Phone: +47 33 45 70 00

e-mail: anne.lill.gade@jotun.no

Manufacturer:

Jotun A/S

Place of production:

Jotun U.A.E. Ltd. (L.L.C.), P.O.Box 3671 Al Quoz Industrial Area, Dubai,

U.A.E.

Management system:

ISO 9001:2008 Certificate nr: 0044915-00, ISO 14001:2004 Certificate

nr 0044914-00, OHSAS 18001:2007 Certificate nr: 0044916-00.

Organisation no:

923 248 579

Issue date: 31.03.2020

Valid to: 31.03.2025

Year of study:

2020

Comparability:

EPD of construction products may not be comparable if they not

comply with EN 15804 and seen in a building context.

Author of the Life Cycle Assessment:

The declaration is developed using eEPD v3.0 from LCA.no

Approval:

Company specific data are:

Collected/registered by: Ken Gudvangen

Managing Director of EPD-Norway

## **Product**

#### Product description:

Hardtop Eco Matt is a two component chemically curing aliphatic acrylic polyurethane coating. It is a high solids product, has low VOC and a matt finish with very good colour and gloss retention.

The declared product contains no solvents on the Hazardous Air Pollutants (HAPs) list. Minor amounts of such solvents may come in through tinting of some colours.

To be used as topcoat in atmospheric environments.

### **Product specification**

For information on Green Building Standard credits, see "Additional Information" on page 4.

The material composition of the declared mixed product is given below:

Materials	%
Binder	25-50
Additive	10-25
Filler	10-25
Solvent	10-25
Titanium dioxide	10-25

#### **Technical data:**

Product mixing ratio (by volume): Hardtop Eco Matt Comp A: 4 part(s) Hardtop Eco Comp B: 1 part(s)

Calculated density 1.4 kg/l

Solids by volume: 73 ± 2 volume%

Dry film thickness: 75 - 100 um. Wet film thickness: 100 - 140 um.

Theoretical spreading rate: 9.7 - 7.3 m<sup>2</sup>/l.

The most representative and worst case formulation produced at the manufacturing site is chosen for this EPD. For products with a selection of colours, this will be the formulation with the highest content of titanium dioxide.

The product packaging is based on an average sized metal packaging, including secondary packaging such as pallets and plastic wrapping.

For safety, health and environmental conditions, see the Safety Data Sheet for the declared product on www.jotun.com.

For information on technical data, application and use of the product, see the Technical Data Sheet for the declared product on www.jotun.com.

#### Market:

Global. Transport to market is not included in this EPD.

### Reference service life, product

The reference service life of the product is highly dependent on the conditions of use.

#### Estimated service life, object

The coated object is not declared.

## LCA: Calculation rules

#### Declared unit:

1 kg Hardtop Eco Matt, Jotun U.A.E. Ltd. (L.L.C.)

#### **Cut-off criteria:**

All major raw materials and essential energy is included. The production process for raw materials and energy flows with very small amounts (less than 0.1 % dry matter) are not included. In total, more than 99% of the material input is included. These cut-off criteria do not apply for non-energy related emissions (such as wastes, hazardous materials and substances).

#### Allocation:

The allocation is made in accordance with the provisions of EN 15804. Incoming energy, water and waste production in-house is primarily allocated equally among all products through mass allocation. Specific allocation was performed for certain waste flows according to information provided by the site manager. VOC emissions have been allocated entirely to the production of solvent based paints. Effects of primary production of recycled materials is allocated to the main product in which the material was used. The recycling process and transportation of the material is allocated to this analysis.

### Data quality:

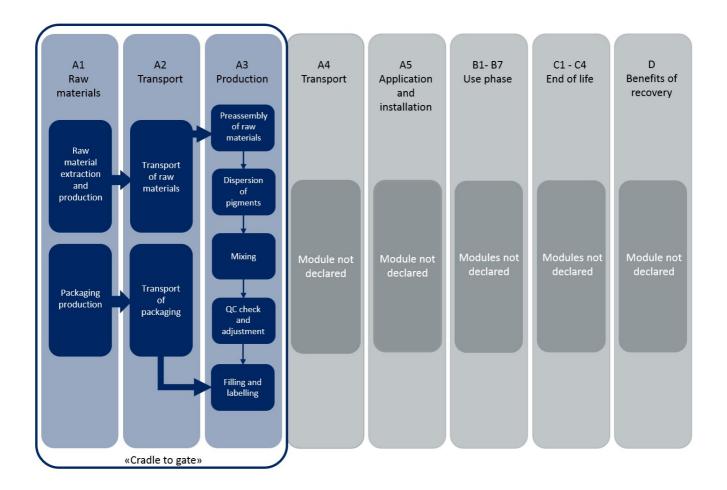

The CEPE database is used as basis for the raw material composition. Specific data for the product composition and raw material amounts has been provided by the manufacturer and represents the production of the declared product. Production site data was collected in 2015. Representative data from ecoinvent v3.2 was used for other processes. The data quality for the material input in A1 is presented in tabular form.

Materials	Source	Data quality	Year
Packaging	Østfoldforskning	Database	2017
Hardtop Eco Comp B	Owner of EPD	Database	2019
Hardtop Eco Matt Comp A	Owner of EPD	Database	2019

#### System boundary:

The flowchart in the figure below illustrates the system boundaries for the analysis, in accordance with the modular principle of EN 15804. The analysis is a cradle-to-gate (A1 - A3) study.

#### Additional information:

The declared product contributes to Green Building Standard credits by meeting the following specific requirements:

#### LEED®v4 (2013)

EQ credit: Low-emitting materials VOC content for Industrial Maintenance Coatings (250 g/l) (CARB(CSM)2007) and emission lower than or equal to 0.5 mg/m3 (CDPH method 1.2 (2017)). MR credit: Building product disclosure and optimization

- Material Ingredients, Option 2: Material Ingredient Optimization, International Alternative Compliance Path REACH optimization: Fully inventoried chemical ingredients to 100 ppm and not containing substances on the REACH Authorization list Annex XIV, the Restriction list Annex XVII and the SVHC candidate list.
- Environmental Product Declarations. Product-specific Type III EPD (ISO 14025;21930, EN 15804) for Jotun U.A.E. Ltd. (L.L.C.)

### BREEAM International (2016):

Mat 01: Product-specific Type III EPD (ISO 14025;21930, EN 15804) for Jotun U.A.E. Ltd. (L.L.C.).

### BREEAM International (2013):

Hea 02: VOC content for Two-pack Performance Coating SB (500 g/l) (EU Directive 2004/42/CE).

### BREEAM® NOR (2012/2016):

Hea 9/02: VOC content for Two-pack Performance Coating SB (500 g/l) (EU Directive 2004/42/CE) and emission demands (ISO 16000-9/10).

Mat 1.3/01: Product-specific Type III EPD (ISO 14025, ISO 21930, EN 15804) for Jotun U.A.E. Ltd. (L.L.C.).

Mat 1.5/01: The product Safety Data Sheet confirms that the product does not contain any substances on the Norwegian A20 list.

## LCA: Scenarios and additional technical information

The following information describe the scenarios in the different modules of the EPD.

This is a cradle to gate (A1-A3) EPD with no declared modules after the factory gate. Transport from place of production to user (A4) has to be calculated by the user.

## **Additional requirements**

#### Greenhouse gas emissions from the use of electricity in the manufacturing phase

National production mix from import, low voltage (production of transmission lines, in addition to direct emissions and losses in grid) of applied electricity for the manufacturing process (A3).

Electricity mix	Data source	Amount	Unit
Electricity, United Arab Emirates (kWh)	ecoinvent 3.3 Alloc Rec	1113,82	g CO2-ekv/kWh

#### **Dangerous substances**

The product contains no substances given by the REACH Candidate list.

#### Indoor environment

The declared product is emission tested by RISE Research Institutes of Sweden/SP Technical Research Institute of Sweden or Eurofins in accordance with California Department of Public Health (CDPH) method 1.2 (2017).
