### **Product**

### Product description:

Flügger Adhesive 378 Strong is a ready-mixed, transparent, extrareinforced adhesive. For indoor use in a dry room for hanging a wall covering 130-250 g/m<sup>2</sup>, e.g. glass felt, fibre felt, structural felt and glass fabric.

Flügger Adhesive 378 Strong is ecolabelled with the Nordic Ecolabel.

For information on Green Building Standard credits and Ecolabels, see "Additional Information" on page 4.

### **Product specification:**

The product is only made in one colour and has no variation in composition.

The material composition of the declared product:

Materials	%
Water	60-70
Binder	15-20
Extender	10-15
Solvent	<1.0
Additive	5-10
Biocide	<0.5

Packaging	kg
Wooden packaging - pallet	4,00E-02
Plastic packaging - pallet	1,40E-03
Plastic packaging	4,19E-02

### Technical data:

Density: 1,05 kg/l Solids by volume: 25,0%

Nominal spreading rate: 3-5 m<sup>2</sup>/l Dilution: Should not be diluted

The product packaging is based on an average sized plastic packaging and is reported in the A1-phase.

For information on technical data, application and use of the product, see the Technical Data Sheet and FDV (*Forvaltning, Drift og Vedlikehold*) for the declared product on www.flugger.no

For safety, health and environmental conditions, see the Safety Data Sheet for the declared product on www.flugger.no.

### Market:

Scandinavia and Europe

### Reference service life, product

The reference service life of the product is highly dependent on the conditions of use.

### Estimated service life, object

The coated object is not declared.

### LCA: Calculation rules

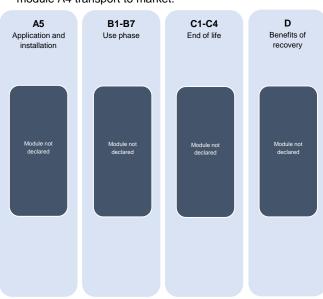

### Declared unit:

1 kg Flügger Adhesive 378 Strong delivered to market

# A1 Raw materials Transport Preassembly of raw materials Transport of raw materials Production Preassembly of raw materials Dispersion of pigments Transport of product to market Transport of product to market System boundaries "Cradle-to-gate" System boundary for this EPD

### System boundary:

The flow chart below illustrates the system boundaries for the analysis according to the module principle in NS-EN 15804. The analysis is carried out from cradle-to-gate (A1-A3), including module A4 transport to market.

### Data quality:

The CEPE database is used as basis for the raw material composition. Specific data for the product composition and raw material amounts has been provided by the manufacturer and represents the production of the declared product. Production site data was collected in 2020, with 2019 as reference year. Remaining data is based on Ecoinvent v3.6, but adjusted to improve representativeness. All energy consumption in the database is assumed not to be used as raw material.

### **Cut-off criteria:**

All major raw materials and essential energy is included. The production process for raw materials and energy flows with very small amounts (<1%), such as consumables in production and administration and employee travel, are not included. These cut-off criteria do not apply for hazardous materials and substances.

### Allocation:

The allocation is made in accordance with the provisions of NS-EN 15804. Incoming energy, water and waste production in-house is primarily allocated equally among all products through volume allocation. The recycling process and transportation of the material is allocated to this analysis.

### Additional information:

The declared product contributes to Green Building Standard credits by meeting the following specific requirements:

- Nordic Swan Ecolabel (3097 0008)
- Properties criteria in BASTA (2020:A2)
- Accepted according to Byggvarubedömningens Assessment Criteria 5.0 (2019)
- Class B according to SundaHus Material Data Assessment Criteria 6.1.5 (2019)

### BREEAM®NOR (2016)

HEA 02: The VOC-Directive does not cover adhesives (EU Directive 2004/42/CE).

Mat 01: The product contains no substances on the Norwegian Technical Check List (A20), which exceeds the limit value for health and environment

Additional certificates and approvals may be available on request.

### LCA: Scenarios and additional technical information

The following information describe the scenarios in the different modules of the EPD.

The only declared module after the factory gate is A4 transport to market.

Transport from production place to user (A4)

Туре	Capacity utilisation incl. return [%]	Type of vehicle	Distance km	Fuel/Energy consumption	Unit
Truck	53	>32t, EURO 6	537	1,92E-02	kg/tkm
Truck	53	>32t, EURO 6	338	1,92E-02	kg/tkm
Truck	26	16-32t, EURO 6	30	4,80E-02	kg/tkm

Construction/Installation (A5)

	Unit	Value

Reading example: 9.0 E-03 = 9.0\*10-3 = 0.009

### **Additional requirements**

### Greenhouse gas emissions from the use of electricity in the manufacturing phase

National production mix from import, low voltage (production of transmission lines, in addition to direct emissions and losses in grid) of applied electricity for the manufacturing process (A3). Background data is presented in the table below. Characterisation factors from NS-EN 15804:2012+A1:2013 is used.

Electricity mix	Data source	Value	Unit
Electricity, Denmark (kWh)	ecoinvent 3.6	329	g CO <sub>2</sub> -eq./kWh

# Dangerous substances ☐ The product contains no substances given by the REACH Candidate list or the Norwegian priority list ☐ The product contains substances given by the REACH Candidate list <0,1 weight% ☐ The product contains substances given by the REACH Candidate list or the Norwegian priority list, see table above ☐ The product contains no substances given by the REACH Candidate list or the Norwegian priority list. The product is characterised as hazardous waste (acc. to the Waste Directive, Appendix III), se table above.

### Indoor environment

The declared product is emission tested according to the ISO-16000 series (2006).
