

# Environmental product declaration

in accordance with ISO 14025 and EN 15804+A2

# PE 100-RC Pressure pipe GPA NO

The Norwegian EPD Foundation

# Owner of the declaration:

**GPA Flowsystem AS** 

#### **Product**

PE 100-RC Pressure pipe GPA NO

#### **Declared unit:**

1 kg

# This declaration is based on Product Category Rules:

CEN Standard EN 15804:2012+A2:2019 serves as core PCR

NPCR 019:2022 Part B for Piping systems use in sewage and storm water systems (under gravity)

#### Program operator:

The Norwegian EPD Foundation

# **Declaration number:**

NEPD-6766-6085-EN

# Registration number:

NEPD-6766-6085-EN

Issue date: 30.05.2024

Valid to: 30.05.2029

#### **EPD** software:

LCAno EPD generator ID: 326177

#### **General information**

#### **Product**

PE 100-RC Pressure pipe GPA NO

#### **Program operator:**

The Norwegian EPD Foundation
Post Box 5250 Majorstuen, 0303 Oslo, Norway

Phone: +47 977 22 020 web: www.epd-norge.no

#### **Declaration number:**

NEPD-6766-6085-EN

#### This declaration is based on Product Category Rules:

CEN Standard EN 15804:2012+A2:2019 serves as core PCR NPCR 019:2022 Part B for Piping systems use in sewage and storm water systems (under gravity)

#### Statement of liability:

The owner of the declaration shall be liable for the underlying information and evidence. EPD Norway shall not be liable with respect to manufacturer information, life cycle assessment data and evidences.

#### **Declared unit:**

1 kg PE 100-RC Pressure pipe GPA NO

#### Declared unit (cradle to gate) with option:

A1-A3,A4,A5,C1,C2,C3,C4,D

#### **Functional unit:**

#### General information on verification of EPD from EPD tools:

Independent verification of data, other environmental information and the declaration according to ISO 14025:2010, § 8.1.3 and § 8.1.4. Verification of each EPD is made according to EPD-Norway's guidelines for verification and approval requiring that tools are i) integrated into the company's environmental management system, ii) the procedures for use of the EPD tool are approved by EPD-Norway, and iii) the process is reviewed annually by an independent third party verifier. See Appendix G of EPD-Norway's General Programme Instructions for further information on EPD tools

#### **Verification of EPD tool:**

Independent third party verification of the EPD tool, background data and test-EPD in accordance with EPDNorway's procedures and guidelines for verification and approval of EPD tools.

Third party verifier:

Elisabet Amat, GREENIZE projects

(no signature required)

#### Owner of the declaration:

GPA Flowsystem AS Contact person: Aleksander Haugen Knutsen Phone: +47 48133609 e-mail: info@gpa.no

#### Manufacturer:

AGRU Kunststofftechnik GmbH

#### Place of production:

AGRU Kunststofftechnik GmbH Ing.-Pesendorfer-Straße 31 4540 Bad Hall, Austria

#### Management system:

ISO 9001 and ISO 14001

#### **Organisation no:**

936 875 025

#### Issue date:

30.05.2024

#### Valid to:

30.05.2029

#### Year of study:

2022

#### **Comparability:**

EPD of construction products may not be comparable if they not comply with EN 15804 and seen in a building context.

#### **Development and verification of EPD:**

The declaration is created using EPD tool lca.tools ver EPD2022.03, developed by LCA.no. The EPD tool is integrated in the company's management system, and has been approved by EPD Norway.

Developer of EPD: Aleksander Knutsen

Reviewer of company-specific input data and EPD: Tobias Antonsen

### Approved:

Håkon Hauan, CEO EPD-Norge

#### **Product**

#### **Product description:**

This EPD covers polyethylene (PE) pipes from 16mm to 1400mm for use in a wide range of applications including, water supply, once-through water systems, irrigation, sewerage, mining, slurry transport, process industry - CPI, ventilation, fuel, compressed air and gas.

#### **Product specification**

EPD covers the products displayed on https://www.gpa.no/Produkter/PE/Ror

| Materials                     | kg   | %      |
|-------------------------------|------|--------|
| Plastic - Polyethylene (HDPE) | 1,00 | 100,00 |
| Total                         | 1,00 | 100,00 |

#### **Technical data:**

EPD covers polyethylene (PE) pipes from D16mm to 1400mm and SDR-class 7,4-41. PE material with density 960 kg/m3

#### Market:

Norway

#### Reference service life, product

100 years

#### Reference service life, building

100 years

#### LCA: Calculation rules

#### **Declared unit:**

1 kg PE 100-RC Pressure pipe GPA NO

#### **Cut-off criteria:**

All major raw materials and all the essential energy is included. The production processes for raw materials and energy flows with very small amounts (less than 1%) are not included. These cut-off criteria do not apply for hazardous materials and substances.

#### Allocation

The allocation is made in accordance with the provisions of EN 15804. Incoming energy and water and waste production in-house is allocated equally among all products through mass allocation. Effects of primary production of recycled materials is allocated to the main product in which the material was used. The recycling process and transportation of the material is allocated to this analysis.

#### Data quality:

Specific data for the product composition are provided by the manufacturer. They represent the production of the declared product and were collected for EPD development in the year of study. Background data is based on registered EPDs according to EN 15804, Ostfold Research databases, ecoinvent and other LCA databases. The data quality of the raw materials in A1 is presented in the table below.

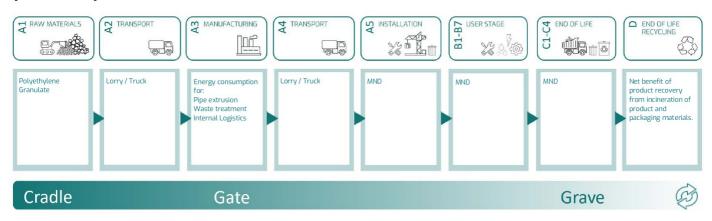

| Materials                     | Source        | Data quality | Year |
|-------------------------------|---------------|--------------|------|
| Plastic - Polyethylene (HDPE) | ecoinvent 3.6 | Database     | 2019 |

#### System boundary:

# Additional technical information:

Packaging material is not included in this EPD, but can be provided for project specific EPD on request.

#### LCA: Scenarios and additional technical information

The following information describe the scenarios in the different modules of the EPD.

A4: The pipes are transported 1700km from Bad Hall, Austria to Langhus, Norway before delivery to customer which is set to 300km. The distance of 300km is given in newer PCRs as a default value for Norwegian domestic transport.

A5: Has not been included due to there being several ways of installation. Project specific EPDs available on request.

C1-C4: Has not been included as it is assumed that the pressure pipes are left as is after end of life.

| Transport from production place to user (A4) | Capacity utilisation<br>(incl. return) % | Distance (km) | Fuel/Energy Consumption | Unit  | Value<br>(Liter/tonne) |
|--|--|---------------|-------------------------|-------|------------------------|
| Truck, 16-32 tonnes, EURO 6 (km) - Europe    | 36,7 %                                   | 1700          | 0,043                   | l/tkm | 73,10                  |
| Truck, 16-32 tonnes, EURO 6 (km) - Europe    | 36,7 %                                   | 300           | 0,043                   | l/tkm | 12,90                  |

#### **LCA: Results**

The LCA results are presented below for the declared unit defined on page 2 of the EPD document.

| Enviro   | Environmental impact             |                        |          |          |    |    |    |    |    |   |  |  |  |

<sup>&</sup>quot;Reading example: 9,0 E-03 = 9,0\*10-3 = 0,009" \*INA Indicator Not Assessed

<sup>1.</sup> The results of this environmental impact indicator shall be used with care as the uncertainties on these results are high or as there is limited experienced with the

<sup>2.</sup> This impact category deals mainly with the eventual impact of low dose ionizing radiation on human health of the nuclear fuel cycle. It does not consider effects due to possible nuclear accidents, occupational exposure nor due to radioactive waste disposal in underground facilities. Potential ionizing radiation from the soil, from radon and from some construction materials is also not measured by this indicator.

CRU = Components for re-use; MFR = Materials for recycling; MER = Materials for energy recovery; EEE = Exported energy electrical; EET = Exported energy thermal

"Reading example: 9,0 E-03 = 9,0\*10-3 = 0,009" \*INA Indicator Not Assessed

| Biogenic Carbon Content |                     |  |  |  |  |  |  |  |  |
|-------------------------|---------------------|--|--|--|--|--|--|--|--|
| Unit                    | At the factory gate |  |  |  |  |  |  |  |  |
| kg C                    | 0,00E+00            |  |  |  |  |  |  |  |  |
| kg C                    | 0,00E+00            |  |  |  |  |  |  |  |  |
|                         | kg C                |  |  |  |  |  |  |  |  |

Note: 1 kg biogenic carbon is equivalent to 44/12 kg CO2

# **Additional requirements**

# Greenhouse gas emissions from the use of electricity in the manufacturing phase

National production mix from import, low voltage (production of transmission lines, in addition to direct emissions and losses in grid) of applied electricity for the manufacturing process (A3).

| Electricity mix  | Source                 | Amount | Unit         |
|--|------------------------|--------|--------------|
| Electricity, quarantee of origin, low voltage, for AGRU factory In Austria (kWh) | Modified ecoinvent 3.6 | 301,58 | g CO2-eg/kWh |

#### **Dangerous substances**

The product contains no substances given by the REACH Candidate list.

#### **Indoor environment**

# **Additional Environmental Information**

| Add | Additional environmental impact indicators required in NPCR Part A for construction products |                        |          |          |    |    |    |    |    |   |  |  |
|-----|--|------------------------|----------|----------|----|----|----|----|----|---|--|--|
|     | Indicator  | Unit                   | A1-A3    | A4       | A5 | C1 | C2 | C3 | C4 | D |  |  |
|     | GWPIOBC  | kg CO <sub>2</sub> -eq | 2,14E+00 | 3,27E-01 | 0  | 0  | 0  | 0  | 0  | 0 |  |  |

GWP-IOBC = Global warming potential calculated according to the principle of instantaneous oxidation. In order to increase the transparency of biogenic carbon contribution to climate impact, the indicator GWP-IOBC is required as it declares climate impacts calculated according to the principle of instantaneous oxidation. GWP-IOBC is also referred to as GWP-GHG in context to Swedish public procurement legislation.
