

IN ACCORDANCE WITH ISO 14025

Environmental product declaration

Owner of the declaration:

Dansk Træemballage A/S

Manufacturer:

Dansk Træemballage A/S

Program holder and publisher:

The Norwegian EPD foundation

Product:

EUR m/træklods

Declaration number:

NEPD-6995-6370-EN

EPD Software:

DTE EPD generator V0

Registration Number:

NEPD-6995-6370-EN

Issue date:

28-06-2024

Valid to:

28-06-2029

General information

Product:

EUR m/trækloids

Program Operator:

The Norwegian EPD Foundation

Post Box 5250 Majorstuen, 0303 Oslo, Norway

Phone: +47 23 08 80 00

E-mail: post@epd-norge.dk

Declaration Number:

NEPD-6995-6370-EN

Comparability

EPDs from other programmes than The Norwegian EPD Foundation may not be comparable.

This declaration is based on PCR:

NPCR 023:2021 Packaging product and services V. 1.1

Statements:

The owner of the declaration shall be liable for the underlying information and evidence. EPD Norway shall not be liable with respect to manufacturer, life cycle assessment data and evidences.

Declared Unit:

One produced unit of packaging

General information on verification of EPD from EPD tools:

Independent verification of data, other environmental information and the declaration according to ISO 14025:2010, § 8.1.3 and § 8.1.4. Individual third party verification of each EPD is not required when the EPD tool is i) integrated into the company's environmental management system, ii) the procedures for use of the EPD tool are approved by EPDNorway, and iii) the process is reviewed annually. See Appendix G of EPD-Norway's General Programme Instructions for further information on EPD tools.

Verification of EPD tool:

Independent third party verification of the EPD tool, background data and test-EPD in accordance with EPD Norway's procedures and guidelines for verification and approval of EPD tools.

Owner of Declaration:

Dansk Træemballage A/S

Contact Person: Christian Rødin-Nielsen

Phone: +45 70 25 12 51

E-mail: dte@dte.dk

Manufacturer:

Dansk Træemballage A/S

Banevej 3, Haastrup, DK-5600 Faaborg

Place of Production:

DTE Facilities in Brande, Denmark with suppliers mostly from Nordic countries

Management System:

ISO 14001:2015

Organization Number

DK 1182 6687

Issue date:

28-06-2024

Valid to:

28-06-2029

Year of the study:

2023

Development and verification of EPD:

The declaration has been developed and verified using the DTE EPD tool V0, developed by NIRAS A/S. The EPD tool is a reference flow tool based on the recipe approach and has been approved by EPD Norway.

Developer of EPD:

Christian Rødin-Nielsen

Reviewer of company specific input data and EPD:

Torkild Hansen

Martin Erlandsson (No signature required)

Independent verifier approved by EPD-Norway

Approved by Managing Director of EPD-Norway

Product:

Product Description:

The wooden pallet is a type of packaging product, which is used in logistics for transporting products of various kinds between product manufacturers, retailers and consumers, as well as for warehouse storage and other operations.

The properties of the wooden pallets differ with regard to length, width, height, weight and approved safe working load. That means the number of boards, nails and blocks used in each pallet type of pallet differ, while the type of materials used are the same. A few types of pallets use wooden blocks instead of the chipboard blocks.

Product Specification:

The main product components are listed in the table below for 1 EUR m/træklods per declared unit.

Materials	KG	%
Spruce Boards	19,82	98,20%
Chipboard Blocks	0,00	0,00%
Steel Nails	0,66	1,80%

Technical Data:

The manufactured transport box has the dimensions 1200x800mm and all wood used is FSC® or PEFC Certified

Market:

The product included in this EPD is considered representative for a Danish scenario. The majority of suppliers are located in Nordic countries and Germany.

Reference service life, product:

A conservative assumption of 20 trips over a period of 5 years is applied. It is assumed that in order to reach a 5-year lifespan, EUR-pallets have to be repaired 4 times.

LCA: Calculation Rules

Declared Unit:

One produced unit of packaging: EUR m/træklods

Data Quality:

Data is overall considered very good and all major processes are represented with data of good quality in compliance with the criteria from ISO 14044 and ISO 14025. Data for raw material quantities, origin of supply, raw material production processes taking place at DTE facilities are provided by reports for the calendar years 2019 and 2020.

Generally, the background datasets are of high quality. Almost all are from Europe and energy is country specific. The majority of the datasets are only a couple of years old and the technologies are well represented. According to the requirements of EN15804, specific manufacturer data has been used for the processes that the manufacturer has direct influence over in their production/processing facility. Generic data has been used for the upstream processes.

Allocation:

All environmental burdens associated with forestry activity are allocated to the wooden logs and none have been attributed to the waste products from forestry (branches and tops). Byproducts resulting in the downstream process (e.g. at the sawmill factory, etc.), which are sold as products themselves, are attributed the burdens of the forestry activities and transport from forests to sawmill by mass allocation, in accordance to EN 15804.

Activities at the sawmill are attributed by economic allocation. The economic allocation is based on the relative revenues from the sawing and the sawn timber is applied for all activities in the sawmill. Here, the overall environmental impact from the sawmill activities allocated to the sawn timber is 69.7 %, 29.1 % for the sawdust used in wooden pellets and 1.2 % for the bark used for various purposes.

System Boundary:

The system boundary comprises the is cradle-to-grave thus cover all the modules for product stage, supply, end-of-life stage and supplementary information (A1-A3, A4, B1, B2, C1-C4 and D).

Cut-Off Criteria

The general rules for the exclusion of inputs and outputs follows the requirements in EN 15804+A2, 6.3.5, where the total of neglected input flows per module shall be a maximum of 5 % of energy usage and mass and 1 % of energy usage and mass for unit processes.

Detailed system boundary

Classification of disclaimers to the declaration of core & additional environmental impact indicators:

ILCD classification	Indicator	Disclaimer
ILCD type / level 1	Global warming potential (GWP)	None
	Depletion potential of the stratospheric ozone layer (ODP)	None
	Potential incidence of disease due to PM emissions (PM)	None
ILCD type / level 2	Acidification potential, Accumulated Exceedance (AP)	None
	Eutrophication potential, Fraction of nutrients reaching freshwater end compartment	None
	Eutrophication potential, Fraction of nutrients reaching marine end compartment (EP-marine)	None
	Eutrophication potential, Accumulated Exceedance (EP-terrestrial)	None
	Formation potential of tropospheric ozone (POCP)	None
ILCD type / level 3	Potential Human exposure efficiency relative to U235 (IRP)	1
	Abiotic depletion potential for non-fossil resources (ADP-minerals&metals)	2
	Abiotic depletion potential for fossil resources (ADP-fossil)	2
	Water (user) deprivation potential, deprivation-weighted water consumption (WDP)	2
	Potential Comparative Toxic Unit for ecosystems (ETP-fw)	2
	Potential Comparative Toxic Unit for humans (HTP-c)	2
	Potential Comparative Toxic Unit for humans (HTP-nc)	2
Potential Soil quality index (SQP)	2	

Disclaimer 1 – This impact category deals mainly with the eventual impact of low dose ionizing radiation on human health of the nuclear fuel cycle. It does not consider effects due to possible nuclear accidents, occupational exposure nor due to radioactive waste disposal in underground facilities. Potential ionizing radiation from the soil, from radon and from some construction materials is also not measured by this indicator.

Disclaimer 2 – The results of this environmental impact indicator shall be used with care as the uncertainties on these results are high or as there is limited experienced with the indicator.

Information describing the biogenic carbon at factory gate:

Biogenic Carbon Content	Unit	Value
Biogenic carbon content in product	kg C	8,92700
Biogenic carbon content in the accompanying packaging	kg CO ₂	0,00

Note: 1 kg C is equivalent of 44/12 CO₂

Additional Requirements:

Greenhous gas emission from the use of electricity in the manufacturing phase:

National production mix from import, medium voltage (production of transmission lines, in addition to direct emissions and losses in grid) of applied electricity for the manufacturing proses (foreground/core) per one produced unit of packaging

National electricity grid	Data source	Foreground / core [kWh]	GWP _{total} [kg CO ₂ -eq/kWh]	SUM [Kg CO ₂ -eq]
Electricity, medium voltage {DK} market for Cut-off, U	Ecoinvent 3.6	2,59E+00	3,41E-01	0,00E+00

Guarantees of origin from the use of electricity in the manufacturing phase:

All electricity used in the manufacturing phase is covered by Guarantees of Origin, therefore no residual electricity mix is accounted for. The amounts in the following table is used for the calculations in this EPD, as all electricity is covered by Guarantees of Origin. No amounts from the previous table is used.

Electricity source	Foreground / core [kWh]	GWP _{total} [kg CO ₂ -eq/kWh]	SUM [Kg CO ₂ -eq]
Guarantee of origin electricity used in the foreground	2,59E+00	2,11E-02	0,00E+00

The Guarantee of Origin utilized in this EPD is provided by EnergiFyn, with a validity period from the 01.01.2024 to the 31.12.2024. Dansk Træemballage A/S has purchased RECS-certificates for unspecified Danish wind power production facilities for 23.000.000 kWh, covering the expected annual electricity consumption of Dansk Træemballage A/S .

Additional environmental impact indicators required for construction products

In order to increase the transparency of biogenic carbon contribution to climate impact, the indicator GWP-IOBC is required as it declares climate impacts calculated according to the principle of instantaneous oxidation. GWP-IOBC is also referred to as GWP-GHG in context to Swedish public procurement legislation.

Parameter	Unit	A1-A3	A4	C1	C2	C3	C4	D
GWP-IOBC	kg	-1,09E-02	6,66E-06	1,85E-05	-2,54E-05	0,00E+00	0,00E+00	-5,79E-03

GWP-IOBC: Global warming potential calculated according to the principle of instantaneous oxidation.

Hazardous Substances:

The declaration is based upon reference to threshold values and/or test results and/or material safety data sheets provided to EPD verifiers. Documentation available upon request to EPD owner.

- The product contains no substances given by the REACH Candidate list or the Norwegian priority list.
- The product contains substances given by the REACH Candidate list or the Norwegian priority list that are less than 0,1 % by weight.
- The product contain dangerous substances, more than 0,1% by weight, given by the REACH Candidate List or the Norwegian Priority list, see table.
- The product contains no substances given by the REACH Candidate list or the Norwegian priority list. The product is classified as hazardous waste

Carbon Footprint:

Carbon footprint has not been worked out for the product.
