

Environmental product declaration

in accordance with ISO 14025 and EN 15804+A2

Tunn LT LED G2

Owner of the declaration:

DEFA Lighting AS

Product:

Tunn LT LED G2

Declared unit:

1 pcs

This declaration is based on Product Category Rules:

CEN Standard EN 15804:2012+A2:2019 serves as core

PCR

IBU PCR - Part B for luminaires, lamps, and components for luminaires

Program operator:

The Norwegian EPD Foundation

Declaration number:

NEPD-7084-6479-EN

Registration number:

NEPD-7084-6479-EN

Issue date: 08.07.2024

Valid to: 08.07.2029

EPD software:

LCAno EPD generator ID: 376100

The Norwegian EPD Foundation Post Box 5250 Majorstuen, 0303 Oslo, Norway

Phone: +47 977 22 020 web: www.epd-norge.no

Declaration number:

NEPD-7084-6479-EN

This declaration is based on Product Category Rules:

CEN Standard EN 15804:2012+A2:2019 serves as core PCR IBU PCR - Part B for luminaires, lamps, and components for luminaires

Statement of liability:

The owner of the declaration shall be liable for the underlying information and evidence. EPD Norway shall not be liable with respect to manufacturer information, life cycle assessment data and evidences.

Declared unit:

1 pcs Tunn LT LED G2

Declared unit with option:

A1,A2,A3,A4,A5,B6,C1,C2,C3,C4,D

Functional unit:

I pcs Tunn LT LED G2, manufactured, installed, used in tunnel 25 years including waste treatment at end-of-life.

General information on verification of EPD from EPD tools:

Independent verification of data, other environmental information and the declaration according to ISO 14025:2010, § 8.1.3 and § 8.1.4. Verification of each EPD is made according to EPD-Norway's guidelines for verification and approval requiring that tools are i) integrated into the company's environmental management system, ii) the procedures for use of the EPD tool are approved by EPD-Norway, and iii) the process is reviewed annually by an independent third party verifier. See Appendix G of EPD-Norway's General Programme Instructions for further information on EPD tools

Verification of EPD tool:

Independent third party verification of the EPD tool, background data and test-EPD in accordance with EPDNorway's procedures and guidelines for verification and approval of EPD tools. Approval number: NEPDT41.

Third party verifier:

Vito D'Incognito, Take Care International

(no signature required)

Owner of the declaration:

DEFA Lighting AS
Contact person:
Phone:
e-mail: peter.beus@defa.com

Manufacturer:

DEFA Lighting AS Slependveien 108 1396 Billingstad, Norway

Place of production:

DEFA Technology Production Site (China Wuxi 214000 Jiangsu, China

Management system:

Organisation no:

931732099

Issue date:

08.07.2024

Valid to:

08.07.2029

Year of study:

2022

Comparability:

EPD of construction products may not be comparable if they not comply with EN 15804 and seen in a building context.

Development and verification of EPD:

The declaration is created using EPD tool lca.tools ver EPD2021.09, developed by LCA.no. The EPD tool is integrated in the company's management system, and has been approved by EPD Norway.

Developer of EPD: Peter Beus

Reviewer of company-specific input data and EPD: Magne Bjorklund

Approved:

Håkon Hauan Managing Director of EPD-Norway

Product

Product description:

Tunnel Light for Low Traffic road tunnels inner zone - 30W - 230V IP 66, Class 1. Body in stainless steel AISI 316L, painted in RAL 7035 (light grey). All electrical components are installed inside the body. No need for external connection box. No external heat zink makes the top of the fitting flat and easy to clean.

Tempered flat glass. The fitting is supplied with electronic LED driver, automatic circuit breaker and breathing filter as standard. Function protected version (UPS) is supplied with ceramic terminal block.

Technical data:

Link to product data on Web page: https://www.defa.com/product/tunn-lt/

Market:

Nordic

Reference service life, product

100 000t (15 -25 years). Estimated based on the characteristic of the product and the intended application.

Reference service life, building or construction works

100 years.

LCA: Calculation rules

Declared unit:

1 pcs Tunn LT LED G2

Cut-off criteria:

All major raw materials and all the essential energy is included. The production processes for raw materials and energy flows with very small amounts (less than 1%) can be excluded. These cut-off criteria do not apply for hazardous materials and substances.

Allocation:

The allocation is made in accordance with the provisions of EN 15804. Incoming energy and water and waste production in-house is allocated equally among all products through mass allocation. Effects of primary production of recycled materials is allocated to the main product in which the material was used. The recycling process and transportation of the material is allocated to this analysis.

Data quality:

Specific data for the product composition are provided by the manufacturer. The data represent the production of the declared product and were collected for EPD development in the year of study. Background data is based on EPDs according to EN 15804 and different LCA databases. The data quality of the raw materials in A1 is presented in the table below.

| Materials | Source | Data quality | Year |

| A1 | | A2 | A3 | A4 | A5 | B1 | B2 | В3 | B4 | B5 | B6 | В7 | C1 | C2 | C3 | C4 | D |
| X | | X | Χ | Χ | X | MND | MND | MND | MND | MND | X | MND | X | X | X | X | X |

System boundary:

The analysis is a cradle-to-grave study made for one luminaire manufactured, installed and used in a tunnel over the lifetime. Modules A1-A5 are included in the analysis. It includes the extraction and production of raw materials, transportation to the factory, the production process itself, transportation to market and installation of the product. B6 is the operational energy usage based on a normal use. C1-C4, D are mandatory modules which include end of life treatment of materials and the benefits from recycling.

Additional technical information:

LCA: Scenarios and additional technical information

The following information describe the scenarios in the different modules of the EPD.

The following information describe the scenarios :

Module A4 = Transport assumes truck (140km) and ship (21000km) from China to Norway warehouse. Warehouse to Customer is considered 300km as an average for Nordic customers.

Module B6 = The operational energy use of the luminaire is calculated based on the methodology provided in IBU PCR Part B for luminaires, lamps, and components for luminaires. The energy consumption model for luminaire used in the PCR follows the application scenarios developed in EN 15193:2007. To calculate the electricity use of the luminaire, the following scenario parameters have been applied:

- Active power of the luminaire (Pa) = 30 Watt
- Passive power of the luminaire (Pp) = 0 Watt
- Daylight time usage (tD) = 0 hours
- Non-daylight time usage (tN) = 8.760 hours
- Standard year time (ty) = 8.760 hours
- The occupancy dependency factor (FO) = 1 (factor, no unit)
- The daylight dependency factor (FD) = 1 (factor, no unit)
- The product specific constant illuminance factor (FCP) = 1 (factor, no unit)
- The non-daylight dimming factor (FN) = 1 (factor, no unit)
- The application specific empiric lifetime of the luminaire in years (a) = 15-25 years (corresponding to the reference service life of the product).

Module C2 = Average transport distance from project site to waste treatment facility = 85 Km

Modules C3 and C4 = Waste treatment of the product follows the default values provided in EN 50693, Product Category Rules for life cycle assessments of electronic and electrical products and systems, table G.4. This table specified how different types of raw materials used in A1 will likely be treated during the end-of-life of the product. Waste treatments in C3 include material recycling and incineration with and without energy recovery and fly ash extraction. Disposal in C4 consist of landfilling of different waste fractions and of ashes.

Module D = The recyclability of metals, plastics, and electronic components allows the producers a credit for the net scrap that is produced at the end of a product's life. The benefits from recycling of net scrap are described in formula from EN 15804:2012+A2:2019. Substitution of heat and electricity generated by the incineration with energy recovery of plastic insulation and other parts is also calculated in module D.

^{*}INA Indicator Not Assessed

^{1.} The results of this environmental impact indicator shall be used with care as the uncertainties on these results are high or as there is limited experienced with the indicator

^{2.} This impact category deals mainly with the eventual impact of low dose ionizing radiation on human health of the nuclear fuel cycle. It does not consider effects due to possible nuclear accidents, occupational exposure nor due to radioactive waste disposal in underground facilities. Potential ionizing radiation from the soil, from radon and from some construction materials is also not measured by this indicator.

| Biogenic Carbon Content | | | | | |
|---|------|---------------------|--|--|--|
| Indicator | Unit | At the factory gate | | | |
| Biogenic carbon content in product | kg C | 0,00E+00 | | | |
| Biogenic carbon content in accompanying packaging | kg C | 2,87E-01 | | | |
| | | | | | |

Note: 1 kg biogenic carbon is equivalent to 44/12 kg CO2

Additional requirements

Greenhouse gas emissions from the use of electricity in the manufacturing phase

National production mix from import, low voltage (production of transmission lines, in addition to direct emissions and losses in grid) of applied electricity for the manufacturing process (A3).

| Electricity mix | Source | Amount | Unit |
|---------------------------|---------------|---------|--------------|
| Electricity, China (kWh) | ecoinvent 3.6 | 1102,91 | g CO2-eq/kWh |
| Electricity, Norway (kWh) | ecoinvent 3.6 | 24,33 | g CO2-eq/kWh |

Dangerous substances

The product contains no substances given by the REACH Candidate list.

Indoor environment

Additional Environmental Information

| Additional environmental impact indicators required in NPCR Part A for construction products | | | | | | | |
|--|------------------------|----------|----------|----------|----------|----------|-----------|
| Indicator | Unit | | A1 | A2 | A3 | A4 | A5 |
| GWPIOBC | kg CO ₂ -eq | | 1,01E+02 | 2,10E-01 | 5,86E+00 | 2,45E+00 | 1,00E-02 |
| Indicator | Unit | В6 | C1 | C2 | C3 | C4 | D |
| GWPIOBC | kg CO ₂ -eq | 7,78E+02 | 0,00E+00 | 1,52E-01 | 1,27E+00 | 1,02E-01 | -1,13E+01 |

GWP-IOBC: Global warming potential calculated according to the principle of instantaneous oxidation. In order to increase the transparency of biogenic carbon contribution to climate impact, the indicator GWP-IOBC is required as it declares climate impacts calculated according to the principle of instantaneous oxidation. GWP-IOBC is also referred to as GWP-GHG in context to Swedish public procurement legislation.
