

## Environmental product declaration

in accordance with ISO 14025 and EN 15804+A2

### AG, Skanska Industrial Solutions, Borlänge asfaltverk

# SKANSKA

The Norwegian EPD Foundation

**Owner of the declaration:** Skanska Industrial Solutions AB

**Product:** AG, Skanska Industrial Solutions, Borlänge asfaltverk

Declared unit: 1 tonne

This declaration is based on Product Category Rules: CEN Standard EN 15804:2012+A2:2019 serves as core PCR NPCR 025:2022 Part B for Asphalt **Program operator:** The Norwegian EPD Foundation

**Declaration number:** 

NEPD-8084-7786-EN

**Registration number:** 

NEPD-8084-7786-EN

Issue date: 14.11.2024

Valid to: 14.11.2029

**EPD software:** LCAno EPD generator ID: 614865

#### **General information**

#### Product

AG, Skanska Industrial Solutions, Borlänge asfaltverk

#### Program operator:

The Norwegian EPD Foundation Post Box 5250 Majorstuen, 0303 Oslo, Norway Phone: +47 977 22 020 web: www.epd-norge.no

#### **Declaration number:**

NEPD-8084-7786-EN

#### This declaration is based on Product Category Rules:

CEN Standard EN 15804:2012+A2:2019 serves as core PCR NPCR 025:2022 Part B for Asphalt

#### Statement of liability:

The owner of the declaration shall be liable for the underlying information and evidence. EPD Norway shall not be liable with respect to manufacturer information, life cycle assessment data and evidences.

#### **Declared unit:**

1 tonne AG, Skanska Industrial Solutions, Borlänge asfaltverk

#### Declared unit with option:

A1,A2,A3,A4,C1,C2,C3,C4,D

#### **Functional unit:**

The term "declared unit" is used in this EPD, as the entire life cycle is not included in this EPD.

#### General information on verification of EPD from EPD tools:

Independent verification of data, other environmental information and the declaration according to ISO 14025:2010, § 8.1.3 and § 8.1.4. Verification of each EPD is made according to EPD-Norway's guidelines for verification and approval requiring that tools are i) integrated into the company's environmental management system, ii) the procedures for use of the EPD tool are approved by EPD-Norway, and iii) the process is reviewed annually by an independent third party verifier. See Appendix G of EPD-Norway's General Programme Instructions for further information on EPD tools

#### Verification of EPD tool:

Independent third party verification of the EPD tool, background data and test-EPD in accordance with EPDNorway's procedures and guidelines for verification and approval of EPD tools.

Third party verifier:

Martin Erlandsson, IVL Swedish Res. Inst

(no signature required)

#### Owner of the declaration:

Skanska Industrial Solutions AB Contact person: Henrik Sjöholm Phone: +46 10-448 71 06 e-mail: Henrik.Sjoholm@Skanska.se

#### Manufacturer:

Skanska Industrial Solutions AB Warfvinges väg 25 112 74 Stockholm, Sweden

#### Place of production:

Borlänge

, Sweden

#### Management system:

ISO 14001, ISO 9001

#### **Organisation no:**

556793-1638

#### Issue date:

14.11.2024

Valid to: 14.11.2029

Year of study:

2023

#### **Comparability:**

EPD of construction products may not be comparable if they not comply with EN 15804 and seen in a building context.

#### **Development and verification of EPD:**

The declaration is created using EPD tool lca.tools ver EPD2022.03, developed by LCA.no. The EPD tool is integrated in the company's management system, and has been approved by EPD Norway.

Developer of EPD: Paulina Johansson

Reviewer of company-specific input data and EPD: Adam Nilsson

#### **Approved:**

Håkon Hauan

Managing Director of EPD-Norway

#### Product

#### **Product description:**

Hot mix base course for roads

#### **Product specification**

AG

| Materials | kg      | %      |
|-----------|---------|--------|
| Additives | 0,10    | 0,01   |
| Aggregate | 958,90  | 95,89  |
| Bitumen   | 41,00   | 4,10   |
| Total     | 1000,00 | 100,00 |

#### **Technical data:**

AG base course according to Swedish road administration specification TDOK 2013:0529

#### Market:

Sweden

#### **Reference service life, product**

Depending on traffic, road design and climate conditions

#### Reference service life, construction work

Depending on traffic, road design and climate conditions

#### **LCA: Calculation rules**

#### **Declared unit:**

1 tonne AG, Skanska Industrial Solutions, Borlänge asfaltverk

#### **Cut-off criteria:**

All major raw materials and all the essential energy is included. The production processes for raw materials and energy flows with very small amounts (less than 1%) are not included. These cut-off criteria do not apply for hazardous materials and substances.

#### Allocation:

The allocation is made in accordance with the provisions of EN 15804. Incoming energy and water and waste production in-house is allocated equally among all products through mass allocation. Effects of primary production of recycled materials is allocated to the main product in which the material was used. The recycling process and transportation of the material is allocated to this analysis.

#### Data quality:

Specific data for the product composition are provided by the manufacturer. The data represent the production of the declared product and were collected for EPD development in the year of study. Background data is based on EPDs according to EN 15804 and different LCA databases. The data quality of the raw materials in A1 is presented in the table below. eurobitume (2019) is not considered conservative according to EN 15804, but is used due to common practice in other LCA tools, EPDs and PCR.

Similarly, specific data have been used for transport distances from supplier to asphalt plant and for all factory data (energy use, waste quantities, etc.). For all other data, generic data available in the EPD tool have been used.

Environmental impact for reclaimed asphalt falls to previous product systems until arrival at the asphalt plant. The asphalt plant uses electricity marked "Good Environmental Choice".

| Materials | Source            | Data quality            | Year |
|-----------|-------------------|-------------------------|------|

#### System boundaries (X=included, MND=module not declared, MNR=module not relevant)

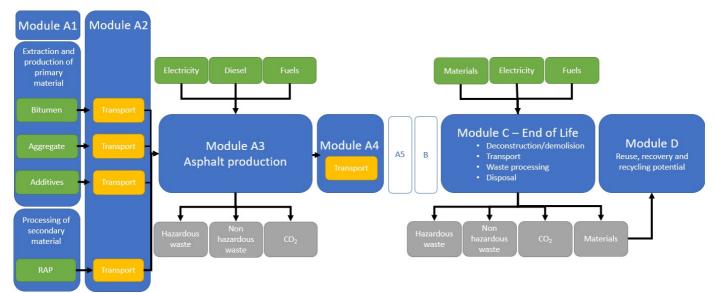

#### System boundary:

In accordance with EN 15804 + A2, the Modules A1-A3, A4, C, D are declared in this EPD.

Modules A1-A3 represent a "cradle to gate" analysis for the asphalt production, Module A4 refers to the transport of finished asphalt mix from asphalt plant to paving site, and Modules C and D are reviewing the end-of-life stage for the product and its reuse, recovery and recycling potential.

Declaration of the RSL is only possible if Module B is included and is therefore not assessed in this study.

The flowchart below visualizes processes in the life cycle of the asphalt.

Additional technical information: 40% reclaimed asphalt is included

#### LCA: Scenarios and additional technical information

The following information describe the scenarios in the different modules of the EPD.

| Transport from production place to user (A4)                   | Capacity utilisation<br>(incl. return) % | Distance (km) | Fuel/Energy Consumption | Unit  | Value<br>(Liter/tonne) |
|--|--|---------------|-------------------------|-------|------------------------|
| Asfaltbil med henger, EURO 6 (km)                              | 55,0 %                                   | 35            | 0,023                   | l/tkm | 0,81                   |
| De-construction demolition (C1)                                | Unit                                     | Value         |                         |       |                        |
| Milling machine, diesel consumption (L)                        | L/DU                                     | 0,40          |                         |       |                        |
| Water (L)  | kg/DU                                    | 12,00         |                         |       |                        |
| Transport to waste processing (C2)                             | Capacity utilisation<br>(incl. return) % | Distance (km) | Fuel/Energy Consumption | Unit  | Value<br>(Liter/tonne) |
| Truck, over 32 tonnes, EURO 6 (km)                             | 55,0 %                                   | 35            | 0,023                   | l/tkm | 0,81                   |
| Waste processing (C3)  | Unit                                     | Value         |                         |       |                        |
| Waste treatment, asphalt to recycling (kg)                     | kg                                       | 900,00        |                         |       |                        |
| Wear of asphalt (kg)   | kg                                       | 100,00        |                         |       |                        |
| Disposal (C4)  | Unit                                     | Value         |                         |       |                        |
| Disposal, landfilling of asphalt (kg)                          | kg/DU                                    | 0,00          |                         |       |                        |
| Benefits and loads beyond the system boundaries (D)            | Unit                                     | Value         |                         |       |                        |
| Substitution of primary asphalt with net recycled asphalt (kg) | kg                                       | 540,00        |                         |       |                        |

## **SKANSKA**

#### **LCA: Results**

The LCA results are presented below for the declared unit defined on page 2 of the EPD document.

PM = Particulate Matter emissions; IRP = Ionizing radiation – human health; ETP-fw = Eco toxicity – freshwater; HTP-c = Human toxicity – cancer effects; HTP-nc = Human toxicity – non cancer effects; SQP = Potential Soil Quality Index (dimensionless)

"Reading example: 9,0 E-03 = 9,0\*10-3 = 0,009" \*INA Indicator Not Assessed

1. The results of this environmental impact indicator shall be used with care as the uncertainties on these results are high or as there is limited experienced with the indicator

2. This impact category deals mainly with the eventual impact of low dose ionizing radiation on human health of the nuclear fuel cycle. It does not consider effects due to possible nuclear accidents, occupational exposure nor due to radioactive waste disposal in underground facilities. Potential ionizing radiation from the soil, from radon and from some construction materials is also not measured by this indicator.

Note: 1 kg biogenic carbon is equivalent to 44/12 kg CO2

#### **Additional requirements**

#### Greenhouse gas emissions from the use of electricity in the manufacturing phase

National production mix from import, low voltage (production of transmission lines, in addition to direct emissions and losses in grid) of applied electricity for the manufacturing process (A3).

| Electricity mix           | Source        | Amount | Unit         |
|---------------------------|---------------|--------|--------------|
| Electricity, Norway (kWh) | ecoinvent 3.6 | 23,68  | g CO2-eq/kWh |

#### **Dangerous substances**

The product contains no substances given by the REACH Candidate list.

Indoor environment

GWP-IOBC: Global warming potential calculated according to the principle of instantaneous oxidation. In order to increase the transparency of biogenic carbon contribution to climate impact, the indicator GWP-IOBC is required as it declares climate impacts calculated according to the principle of instantaneous oxidation. GWP-IOBC is also referred to as GWP-GHG in context to Swedish public procurement legislation.
