Statement of liability:

The owner of the declaration shall be liable for the underlying information and evidence. EPD Norway shall not be liable with respect to manufacturer information, life cycle assessment data and evidences.

Declared unit:

1 pcs X-CUBE CROFCU

Declared unit with option:

A1-A3,A4,C1,C2,C3,C4,D

Functional unit:

-

General information on verification of EPD from EPD tools:

Independent verification of data, other environmental information and the declaration according to ISO 14025:2010, § 8.1.3 and § 8.1.4. Verification of each EPD is made according to EPD-Norway's guidelines for verification and approval requiring that tools are i) integrated into the company's environmental management system, ii) the procedures for use of the EPD tool are approved by EPD-Norway, and iii) the process is reviewed annually by an independent third party verifier. See Appendix G of EPD-Norway's General Programme Instructions for further information on EPD tools

Verification of EPD tool:

Independent third party verification of the EPD tool, background data and test-EPD in accordance with EPDNorway's procedures and guidelines for verification and approval of EPD tools.

Third party verifier:

Alexander Borg, Asplan Viak AS

(no signature required)

Owner of the declaration:

TROX Group

Contact person: Alina Buchner Phone: +49 2845 2020

e-mail: productsustainability-de@troxgroup.com

Manufacturer:

TROX Group Heinrich-Trox-Platz 1

47506 Neukirchen-Vluyn, Germany

Place of production:

TROX GmbH - Werk Anholt Gendringer Str. 85 46419 Isselburg, Germany

Management system:

ISO 9001, ISO 14001:2015, ISO 50001:2018

Organisation no:

DE 120250070

Issue date:

20.12.2024

Valid to:

20.12.2029

Year of study:

2023

Comparability:

EPD of construction products may not be comparable if they not comply with EN 15804 and seen in a building context.

Development and verification of EPD:

The declaration is created using EPD tool lca.tools ver EPD2022.03, developed by LCA.no. The EPD tool is integrated in the company's management system and has been approved by EPD Norway.

Developer of EPD: Janik Horst

Reviewer of company-specific input data and EPD: Alina Buchner

Approved:

Håkon Hauan

Managing Director of EPD-Norway

Product

Product description:

The X-CUBE CROFCU is a compact air handling unit which, as a secondary unit, is able to establish and maintain essential guaranteed values for clean rooms of all classes. At the same time, it also has the option of monitoring and controlling personnel and material airlocks. It contains all the necessary components in a space-saving and flow-optimised arrangement, including the option of mixing in outside air, while at the same time discharging room air as exhaust air without short-circuiting the air flows.

For more information see: https://www.trox.de/raumlufttechnische-geraete/x-cube-crofcu-4c9509c35c87a213.

Product specification

The air volume is variably adjustable from 0 to $5,000 \text{ m}^3/\text{h}$ or $10,000 \text{ m}^3/\text{h}$, the nominal air volume is $4,200 \text{ m}^3/\text{h}$ for the X variant and $8,400 \text{ m}^3/\text{h}$ for the XL variant at 800 Pa external pressure loss.

CROFCU means CleanROomFanCoilUnit. The type code of this product is: CRO/D/X/EU/100/SC/CSM/B/5RR/OKW/ePM1-85%/750/750. Further information is available at trox.de.

Technical data:

Variable circulation airflows up to 10000 m^3/h . Supply and mixing of fresh air from 50 m^3/h to 5000 m^3/h .

Limits of the air handling unit:

Volume flow: from 0 to approx. 10.000 m³/h (0 to 2,8 m³/s)

Operating temperature: -30 to +50 °C

Variants: 2 sizes

The product configuration and technical data can be found in the project-specific data sheet.

Market:

Europe.

Reference service life, product

20 years.

Reference service life, building or construction works

60 years.

LCA: Calculation rules

Declared unit:

1 pcs X-CUBE CROFCU

Cut-off criteria:

All major raw materials and all the essential energy is included. The production processes for raw materials and energy flows with very small amounts (less than 1%) are not included. These cut-off criteria do not apply for hazardous materials and substances.

Allocation:

The allocation is made in accordance with the provisions of EN 15804. Energy, water and waste production in-house is allocated equally among all products through mass allocation. Effects of primary production of recycled materials is allocated to the main product in which the material was used. The recycling process and transportation of the material is allocated to this analysis.

Data quality:

Specific data for the product composition are provided by the manufacturer. The data represent the production of the declared product and were collected for EPD development in the year of study. Background data is based on EPDs according to EN 15804 and different LCA databases. The data quality of the raw materials in A1 is presented in the table below.

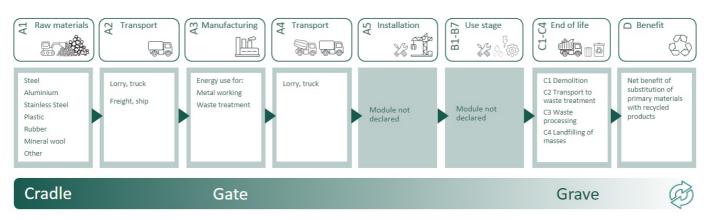

Materials	Source	Data quality	Year

Additional technical information:

TROX offers the X-CUBE CROFCU and thus a completely new clean room planning concept. The compact, factory-tested secondary unit is designed for combination with centralised air conditioning and ventilation systems and can be ideally placed in suspended ceilings thanks to its design.

With its special features, it fulfils the essential ventilation and air conditioning requirements for class C and D cleanrooms:

- Removal of high heat loads.
- Addition of required outside air.
- Room pressurisation through integrated volume flow control.
- Suitable for all clean room concepts.
- Suitable for all cleanroom classes in accordance with ISO 14644-1 through combination with HEPA filters.
- Pump chilled water cooler with room temperature control.
- Variable recirculated air volume flows up to 6000 m³/h.
- Can be used flexibly by interconnecting several units.
- Energy-efficient free-running fan with EC drive.
- Supply and admixture of fresh air from 50 m³/h to 2000 m³/h.
- Monitoring of the downstream filters.
- Personnel and material airlock control.
- Contamination control through pressure zone control.
- Space saving due to smaller air ducts.
- Plug and play quick and easy commissioning.

LCA: Scenarios and additional technical information

The following information describe the scenarios in the different modules of the EPD.

Transport from production place to user (A4)	Capacity utilisation (incl. return) %	Distance (km)	Fuel/Energy Consumption	Unit	Value (Liter/tonne)
Truck, 16-32 tonnes, EURO 6 (km)	36,7 %	800	0,043	l/tkm	34,40
De-construction demolition (C1)	Unit	Value			
Demolition of building per kg of ventilation product (kg)	kg	501,72			
Transport to waste processing (C2)	Capacity utilisation (incl. return) %	Distance (km)	Fuel/Energy Consumption	Unit	Value (Liter/tonne)
Truck, 16-32 tonnes, EURO 6 (km)	36,7 %	50	0,043	l/tkm	2,15
Waste processing (C3)	Unit	Value			
Materials to recycling (kg)	kg	279,42			
Waste treatment per kg Rubber, municipal incineration with fly ash extraction (kg)	kg	2,98			
Waste treatment per kg Polypropylene (PP), incineration (kg)	kg	0,010			
Waste treatment per kg Plastics, incineration (kg)	kg	13,56			
Waste treatment per kg Hazardous waste, incineration (kg)	kg	0,00058			
Waste treatment per kg Electronic scrap, incineration (kg)	kg	31,75			
Disposal (C4)	Unit	Value			
Waste, scrap steel, to landfill (kg)	kg	29,80			
Landfilling of ashes from incineration of Rubber, municipal incineration with fly ash extraction (kg)	kg	0,15			
Waste, plastic, mixture, to landfill (kg)	kg	16,55			
Landfilling of ashes from incineration of Polypropylene (PP), process per kg ashes and residues (kg)	kg	0,00029			
Waste treatment per kg Brass slag, to landfill, residual material landfill (kg)	kg	0,083			
Waste, aluminium, to landfill (kg)	kg	0,78			
Landfilling of ashes from incineration of Plastics, process per kg ashes and residues (kg)	kg	3,12			
Waste, mineral wool, to landfil (kg)	kg	17,30			
Landfilling of ashes from incineration per kg Hazardous waste, from incineration (kg)	kg	0,00010			
Waste, scrap lead, to landfill (kg)	kg	0,00046			
Waste, hazardous waste, to landfill (kg)	kg	0,00058			
Waste treatment per kg Copper slag, to landfill, residual material landfill (kg)	kg	0,0080			
Landfilling of ashes from incineration of Electronic scrap, process of ashes and residues (kg)	kg	22,27			
Benefits and loads beyond the system boundaries (D)	Unit	Value			
Substitution of primary steel with net scrap (kg)	kg	92,092			
Substitution of thermal energy, district heating (MJ)	MJ	62,14			
Substitution of electricity (MJ)	MJ	4,10			
Substitution of primary Brass with net scrap (kg)	kg	0,22			
Substitution of primary aluminium with net scrap (kg)	kg	10,38			
Substitution of primary lead with net scrap (kg)	kg	0,0041			
Substitution of primary copper with net scrap (kg)	kg	0,060			

LCA: Results

The LCA results are presented below for the declared unit defined on page 2 of the EPD document.

[&]quot;Reading example: 9,0 E-03 = 9,0*10-3 = 0,009" *INA Indicator Not Assessed

^{1.} The results of this environmental impact indicator shall be used with care as the uncertainties on these results are high or as there is limited experienced with the indicator

^{2.} This impact category deals mainly with the eventual impact of low dose ionizing radiation on human health of the nuclear fuel cycle. It does not consider effects due to possible nuclear accidents, occupational exposure nor due to radioactive waste disposal in underground facilities. Potential ionizing radiation from the soil, from radon and from some construction materials is also not measured by this indicator.

CRU = Components for re-use; MFR = Materials for recycling; MER = Materials for energy recovery; EEE = Exported energy electrical; EET = Exported energy thermal

"Reading example: 9,0 E-03 = 9,0*10-3 = 0,009" *INA Indicator Not Assessed

Biogenic Carbon Content										
Unit	At the factory gate									
kg C	0,00E+00									
kg C	0,00E+00									
	kg C									

Note: 1 kg biogenic carbon is equivalent to 44/12 kg CO2

Additional requirements

Greenhouse gas emissions from the use of electricity in the manufacturing phase

National production mix from import, low voltage (production of transmission lines, in addition to direct emissions and losses in grid) of applied electricity for the manufacturing process (A3).

Electricity mix	Source	Amount	Unit
Electricity, market mix (kWh) - Germany	ecoinvent 3.6	585,93	g CO2-eg/kWh

Dangerous substances

The product contains dangerous substances, more than 0,1% by weight, given by the REACH Candidate List, see table:

Name	CASNo	Amount
Lead	7439-92-1	> 0.1% w/w
Potassium 1,1,2,2,3,3,4,4,4-nonafluorobutane-1-sulphonate	29420-49-3	> 0.1% w/w
2-methylimidazole	693-98-1	> 0.1% w/w
Diboron trioxide	1303-86-2	> 0.1% w/w
Lead monoxide (lead oxide)	1317-36-8	> 0.1% w/w
Lead titanium trioxide	12060-00-3	> 0.1% w/w
Perfluorobutane sulfonic acid (PFBS) and its salts		> 0.1% w/w

Indoor environment

Additional Environmental Information

Additional environmental impact indicators required in NPCR Part A for construction products									
Indicator	Unit	A1-A3	A4	C1	C2	C3	C4	D	
GWPIOBC	kg CO ₂ -eq	3,05E+03	6,83E+01	6,62E-01	4,27E+00	8,12E+01	5,94E+00	-2,70E+02	

GWP-IOBC: Global warming potential calculated according to the principle of instantaneous oxidation. In order to increase the transparency of biogenic carbon contribution to climate impact, the indicator GWP-IOBC is required as it declares climate impacts calculated according to the principle of instantaneous oxidation. GWP-IOBC is also referred to as GWP-GHG in context to Swedish public procurement legislation.
