Declared unit:

1 pcs Shape Storage High

Declared unit (cradle to gate) with option:

A1-A3,A4,A5,B2,B3,B4,C1,C2,C3,C4,D

Functional unit:

Dynamic and practical storage with a focus on flexibility and options to meet the unique needs of each room. Shape Storage High is available with 1, 2, 3, 4 or 6 lockers.

This main EPD is based on Shape Storage High (6 lockers) in melamine with a Depth of 485 mm (501 mm with doors). Other sizes and materials are calculated as variants. Doors and plinths are calculated separately as options.

General information on verification of EPD from EPD tools:

Independent verification of data, other environmental information and the declaration according to ISO 14025:2010, § 8.1.3 and § 8.1.4. Verification of each EPD is made according to EPD-Norway's guidelines for verification and approval requiring that tools are i) integrated into the company's environmental management system, ii) the procedures for use of the EPD tool are approved by EPD-Norway, and iii) the process is reviewed annually by an independent third party verifier. See Appendix G of EPD-Norway's General Programme Instructions for further information on EPD tools

Comparability:

EPD of construction products may not be comparable if they not comply with EN 15804 and seen in a building context.

Development and verification of EPD:

The declaration is created using EPD tool lca.tools ver EPD2022.03, developed by LCA.no. The EPD tool is integrated in the company's management system, and has been approved by EPD Norway.

Product

Product description:

Dynamic and practical storage with a focus on flexibility and options to meet the unique needs of each room. All modules can be combined both horizontally and vertically.

Create your own storage by combining practical wardrobes with shoe racks, benches, and personalized storage. Doors are available in multiple heights and can be chosen with different types of locks, handles, and knobs. Add open or low storage to create the right ambiance in the room. The modules are installed on plinths that come in three optional heights.

Shape Storage High is available with 1, 2, 3, 4 or 6 lockers, in a variety of colors and veneers. Shape Storage High can also be chosen in depths of 431 or 596 mm. (These depths are with doors. Doors are calculated in options - Depths without doors: 415 and 580 mm).

More information about the product can be found here: https://www.edsbyn.com/products/shape/storage/

Product specification

Office furniture, personal locker - Shape Storage High with 6 lockers. (Doors calculated separately as options). Carcass and shelves in melamine faced chipboard with matching ABS edge strip.

6 lockers (3 width x 2 height) measures: Width 1213 mm, Depth including doors 501 mm. Total Height varies depending on your choice of plinth:

- 1536 mm without plinth
- 1566 mm with plinth 30 mm
- 1566 mm with plinth 30 mm
- 1664 mm with plinth 128 mm
- 1856 mm with plinth 320 mm.

Other shapes, sizes and materials of the carcass are calculated in Variants. Plinths and doors are calculated separately in Options.

LCA: Calculation rules

Declared unit:

1 pcs Shape Storage High

Cut-off criteria:

All major raw materials and all the essential energy is included. The production processes for raw materials and energy flows with very small amounts (less than 1%) are not included. These cut-off criteria do not apply for hazardous materials and substances.

Allocation:

The allocation is made in accordance with the provisions of EN 15804. Incoming energy and water and waste production in-house is allocated equally among all products through mass allocation. Effects of primary production of recycled materials is allocated to the main product in which the material was used. The recycling process and transportation of the material is allocated to this analysis.

Data quality:

Specific data for the product composition are provided by the manufacturer. They represent the production of the declared product and were collected for EPD development in the year of study. Background data is based on registered EPDs according to EN 15804, Ostfold Research databases, ecoinvent and other LCA databases. The data quality of the raw materials in A1 is presented in the table below.

1. The results of this environmental impact indicator shall be used with care as the uncertainties on these results are high or as there is limited experienced with the indicator

2. This impact category deals mainly with the eventual impact of low dose ionizing radiation on human health of the nuclear fuel cycle. It does not consider effects due to possible nuclear accidents, occupational exposure nor due to radioactive waste disposal in underground facilities. Potential ionizing radiation from the soil, from radon and from some construction materials is also not measured by this indicator.

Biogenic Carbon Content

Indicator	Ilatio	At the featers rate
Indicator	Unit	At the factory gate
Biogenic carbon content in product	kg C	2,70E+01
Biogenic carbon content in accompanying packaging	kg C	6,04E-01

Note: 1 kg biogenic carbon is equivalent to 44/12 kg CO2

Additional requirements

Greenhouse gas emissions from the use of electricity in the manufacturing phase

National production mix from import, low voltage (production of transmission lines, in addition to direct emissions and losses in grid) of applied electricity for the manufacturing process (A3).

Electricity mix	Source	Amount	Unit
Electricity, Sweden (kWh)	ecoinvent 3.6	54,94	g CO2-eq/kWh

Dangerous substances

The product contains no substances given by the REACH Candidate list.

Indoor environment

No effect on indoor environment.

GWP-IOBC: Global warming potential calculated according to the principle of instantaneous oxidation. In order to increase the transparency of biogenic carbon contribution to climate impact, the indicator GWP-IOBC is required as it declares climate impacts calculated according to the principle of instantaneous oxidation. GWP-IOBC is also referred to as GWP-GHG in context to Swedish public procurement legislation.
